PROFESSIONAL SUMMARY

A Motivated Computer Science and Engineering undergraduate with a strong foundation in Software Development & Full Stack Development, problem-solving, and database management. Skilled in developing web applications and implementing practical solutions through academic projects and internship experience. Passionate about learning new technologies. A collaborative team player with strong analytical and communication skills. Seeking an entry-level Software Engineer role to contribute effectively while continuously growing professionally.

EDUCATION

B.E (COMPUTER SCIENCE AND ENGINEERING)

2023-2027

GOVERNMENT COLLEGE OF TECHNOLOGY ,COIMBATORE

CGPA : 8.02

PROJECTS

AI-POWERED DIABETES PREDICTION & HEALTH RECOMMENDATION SYSTEM

Technologies Used: Python, Flask, Machine Learning

- Developed a system that predicts diabetes risk using a person's health information and helps users understand their health condition through instant analysis.
- Provided personalized food and lifestyle recommendations based on the prediction, enabling users to make informed decisions for better health management.

INTERN WORK EXPERIENCE

PYTHON FULL STACK DEVELOPER

Apr 2026-Present

- Contributed to the development and maintenance of web application modules by implementing user-friendly features and supporting end-to-end application functionality.
- Worked with database management, version control, debugging, testing, and followed the Software Development Life Cycle while collaborating effectively with the development team

Web-Based Printing Service Platform

- Developed an online platform that connects customers, designers, and printing vendors in a single workflow. It simplifies the process from design submission to final order delivery.
- Implemented secure user access, order management, design approval, and real-time order tracking. The system ensures smooth communication and efficient management of printing requestst

SKILLS

Programming Language: Python, Java, C

Technical Skills: HTML, CSS

Database: MySQL
